Education

University of California, Riverside

Master of Science in Computer Engineering

Graduated: June, 2016

GPA: 3.4

Jawaharlal Nehru Technological University, Hyderabad

Bachelor of Science in Computer Science & Engineering

Graduated: June, 2015

GPA: 3.7

Skills

- Programming Languages: C, Java
- Front-End: HTML, CSS, JavaScript, AngularJS, BackboneJS, JQuery, Bootstrap, UI Tools
- Back-End: Ruby on Rails, Node.js
- Databases: MySQL, SQLite, MongoDB
- Operating Systems: Windows, Linux
- Tools: Eclipse, Visual Studio, Photoshop
- Miscellaneous: Git, Shell Scripting, Responsive Web Design, Web Services

Research/Work Experience

University of California, Riverside

January 2016 – March 2016

A survey on vulnerabilities and security solutions in NFC devices

- Authored a literature survey on vulnerabilities and solutions in Near Field Communication devices
- Examined the existing security threats and possibilities for attacks in the NFC devices
- Analyzed and critiqued the existing security solutions for the potential threats in NFC devices

Dexter Labs, Hyderabad, India

July 2014 – December 2014

Android Development Intern

- Coordinated my team of two members to successfully develop 'Attendance Digitaziler' application
- Designed to simplify the way professors mark attendance
- Implemented the user functionality, database and user interface

Academic Projects

University of California, Riverside

January 2016 – March 2016

XV6 Operating System Project (C)

- Implemented a new system call and lottery scheduling for process management
- Upgraded the Virtual memory features to trap and kill a process that tries to access a null pointer
- Programmed real kernel threads on the XV6 operating system

University of California, Riverside

September 2015 – December 2015

Synthesis of Digital Systems Projects (HTML, CSS, JQuery)

- Implemented Left-edge algorithm for Channel routing problem.
- Implemented Quine-McCluskey algorithm for minimization of Boolean functions.
- Implemented Simulated Annealing heuristic for Channel routing problem.

Jawaharlal Nehru Technological University, Hyderabad

December 2014 – April 2015

Online IDE Project (HTML, CSS, JavaScript, Ruby on Rails)

- Developed an Online Integrated Development Environment web application
- Designed to simply the way programmers create their projects and access them
- Provided support for C, C++, Java, Python and JavaScript

Personal Projects - [GitHub](#)

Currently pursuing **Full Stack Web Development specialization – Coursera, Ruby on Rails Web Development – Coursera.**
